Angle Agony

F In quadrilateral ABCD perpendicular diagonals AC and BD intersect at E. F is the midpoint of AB and G is the midpoint of CD. A circle with center at Q and diameter HJ passing through E, F, and G is tangent to AB at F and tangent to CD at G. If $FG = 379.935'$, what is HJ ? ■

For the solution to this problem (and much more), please visit our website at: www.amerisurv.com. Good luck!
